

Start with the workflow that matters.

Evaluate Vision against your real work, decisions and delivery evidence.

A product tour can look compelling while leaving the hardest handoff untested. A focused evaluation starts with a clear outcome and the people responsible for it.

What changes for your team

- Define what successful delivery means before implementation.
- Surface integration and access requirements early.
- Use concrete acceptance criteria for a pilot decision.

Explore the workflow

- Tasks, projects and service workflows demonstrated in context
- Named reviews and linked source evidence
- Views that make ownership, waiting work and outcomes visible

Explore Vision at <https://nanox.tv> and arrange a demonstration around one real workflow.

Explore Nano X at nanox.tv or ask your representative for a scoped walkthrough.

Availability depends on your release, permissions, enabled modules and connection setup. Verify the exact workflow before commitment.
