

Make the portfolio conversation explainable.

Connect project health, ownership and next decisions to the work that supports them.

Leadership needs more than a status color. Teams need a practical way to show the work, risks and evidence behind the update.

What changes for your team

- Inspect the source of project and portfolio signals.
- Keep plans, owners and updates close to delivery work.
- Separate code progress from deployment and acceptance.

Explore the workflow

- Project List and Cards with searchable columns and sorting
- Portfolio views for prioritization, initiatives, timeline and capacity
- Connected delivery paths and conditional history-based forecasts

Explore Vision at <https://nanox.tv> and arrange a demonstration around one real workflow.

Explore Nano X at nanox.tv or ask your representative for a scoped walkthrough.

Availability depends on your release, permissions, enabled modules and connection setup. Verify the exact workflow before commitment.
