Make repeatable work easier to run.

Create fresh tasks from a reviewed outline and keep each occurrence accountable.

Copying an old task can carry stale decisions and discussions into a new cycle. Repetition should preserve useful structure while giving the new work its own evidence.

What changes for your team

- Reuse task outlines without copying old approvals.
- Inspect the history of scheduled occurrences.
- Keep personal deadlines visible through in-app reminders.

Explore the workflow

- Personal task templates with hierarchy, owners and due offsets
- Daily, weekly and monthly timezone-aware schedules
- Pause, resume, skip and occurrence history

Explore Vision at https://nanox.tv and arrange a demonstration around one real workflow.

Explore Nano X at nanox.tv or ask your representative for a scoped walkthrough.

Availability depends on your release, permissions, enabled modules and connection setup. Verify the exact workflow before commitment.
